

**TECHTEAMS**

## Hello, I'm Dennis

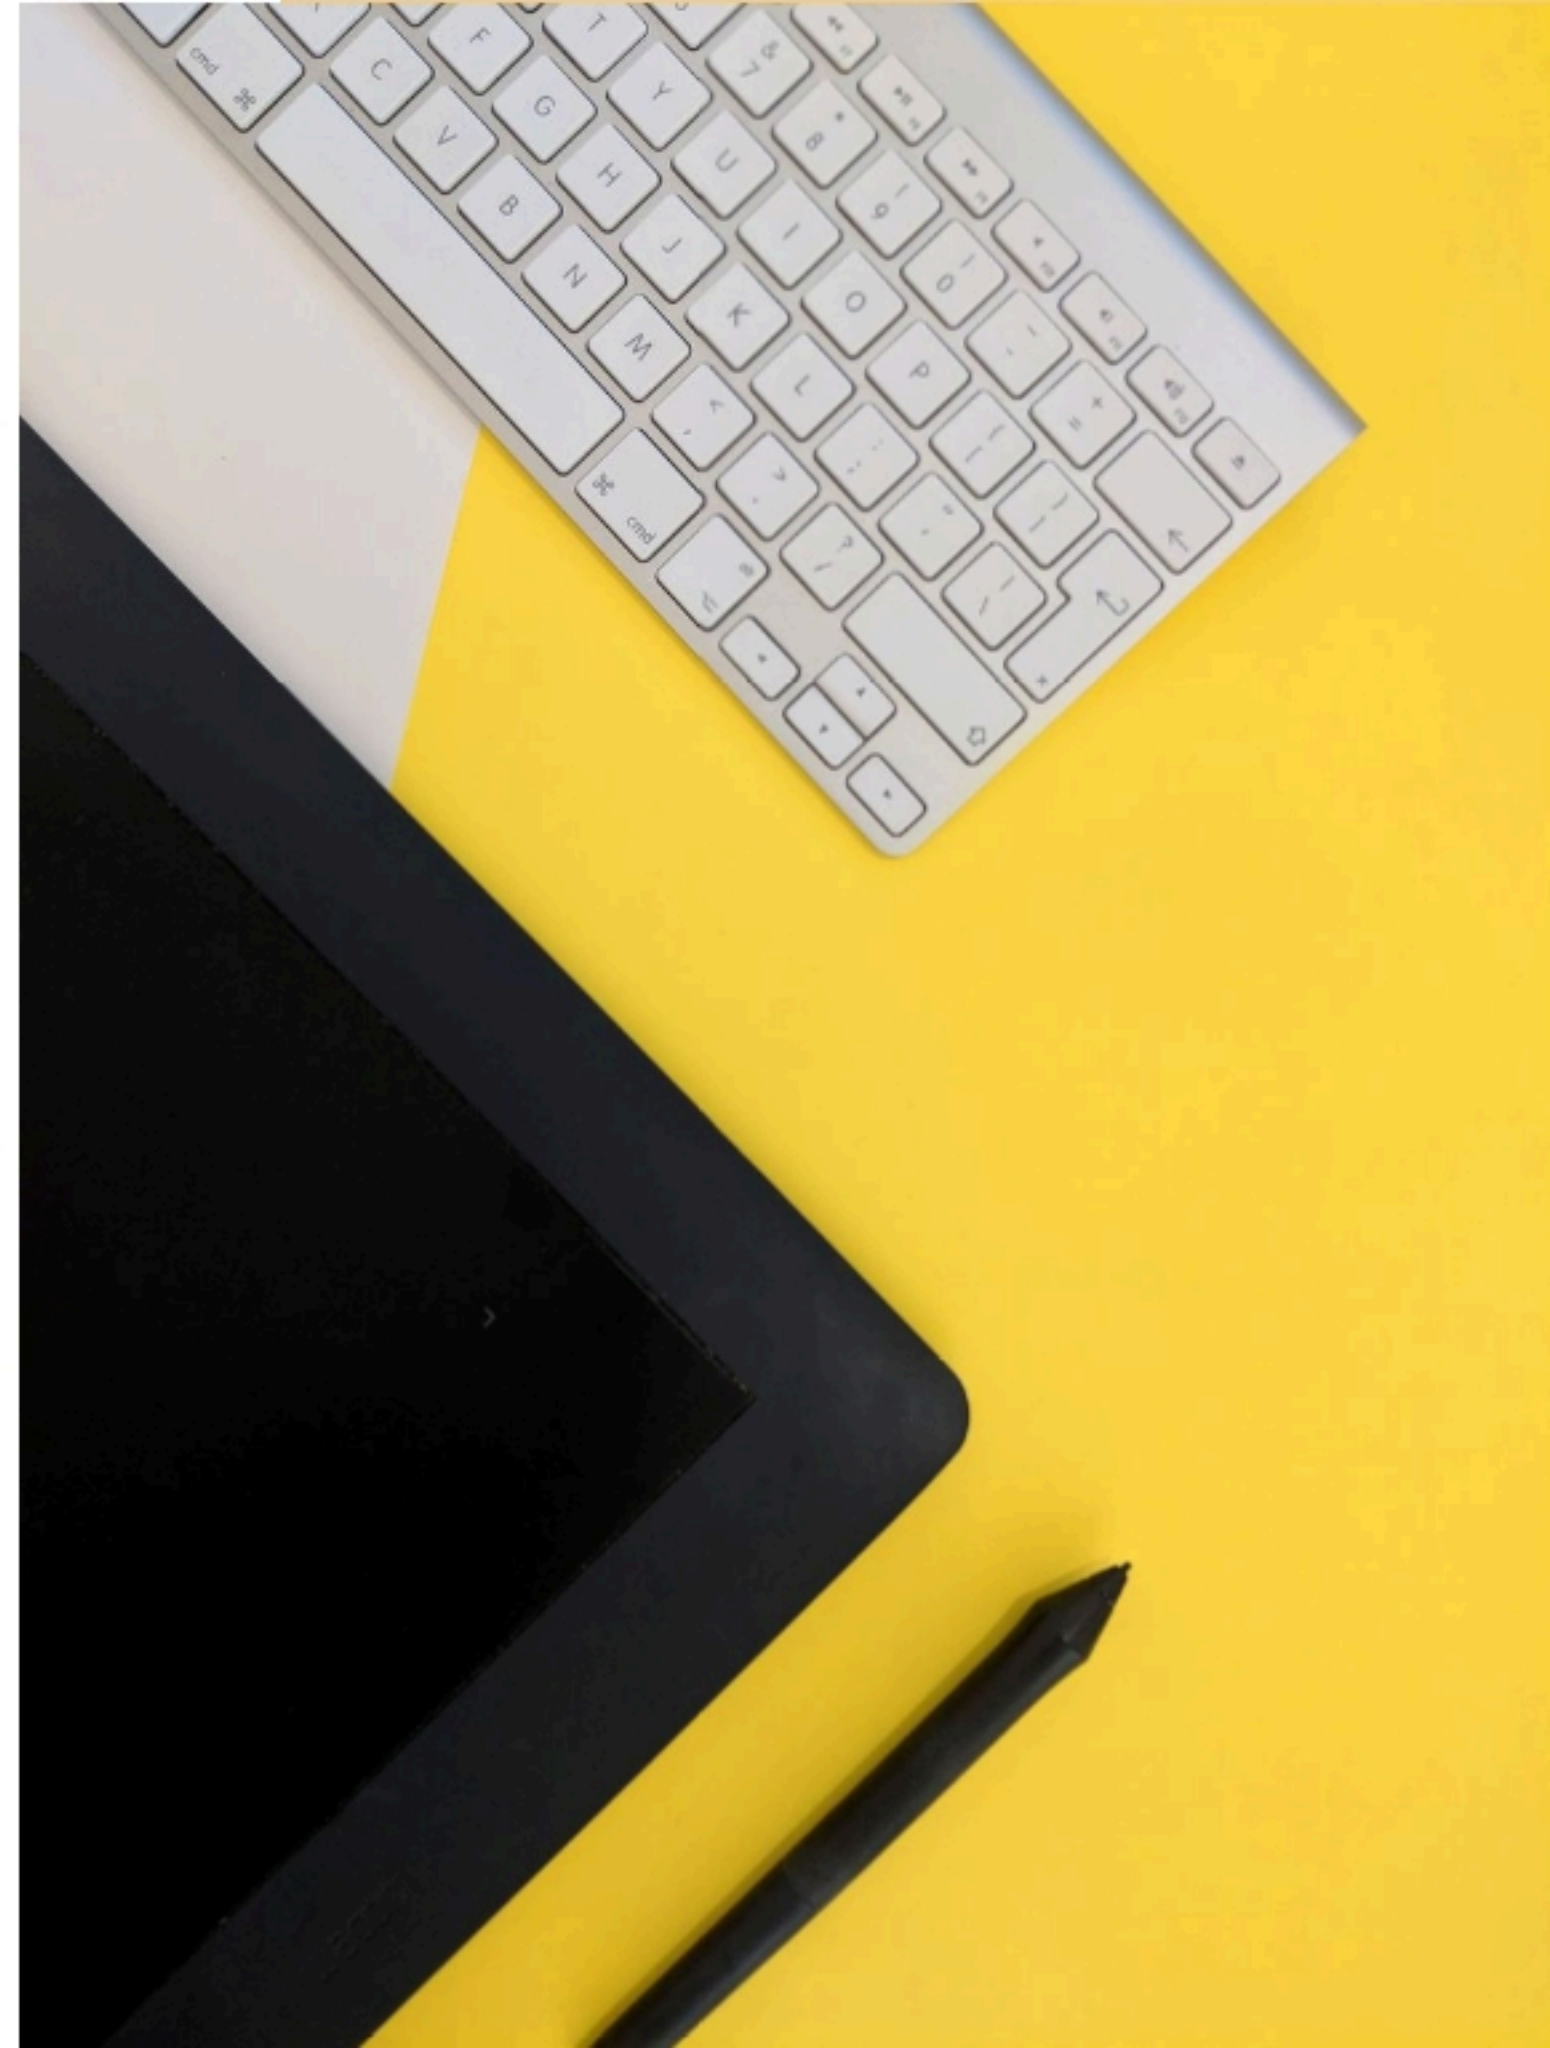

and I will be one of your TechTeam leaders this semester! I am a third-year SIAT student planning on concentrating in design. My main interests are UX/UI Design and Human-Computer Interaction. I like cooking, mechanical keyboards, and FPS games. My main goal as a TechTeam leader is to share my experiences with everyone so that they can find success on their journey through SIAT.

# What is TechTeams?

TechTeams is first year mentorship program designed to help students transition into SIAT. We offer weekly workshops that include topics such as:

- What to expect in your first year
- Information about co-op
- Insights from senior students
- Learning about campus resources (there are a surprisingly large number available to us)
- Help with course planning

# Get Involved

## **Make new friends**

You will be doing a lot of group work in SIAT, why not make some friends along the way?

## **Gain insider information on how to get those A's**

Want to avoid unknowingly taking 4 courses that all have final group projects? That's what we're here to help with.

## **We're here for YOU**

We've been where you are right now and we are excited to pass on our knowledge and insight to help you achieve your goals in SIAT.

**Thank you!**
